Federal regulations require effort certification for all personnel charged to federally sponsored research grants. The use of web-time entry or timecards will satisfy this obligation for staff and students.

**Staff vs. Student**

Please keep in mind that *students hired from other schools are staff employees* and their pay is part of the staff payroll cycle and not the student payroll cycle. Please complete the *Staff New Hire/Rehire Paid Hourly PAF* found at the link below, rather than the Student Summer Research Payment Form, for these students. In addition, please send these students to the Human Resources Office instead of the Student Employment Office to fill out all pre-employment paperwork. Please contact your department admin or department staff member assigned to help with Human Resource hires for assistance in completing this PAF. Please send the completed PAF to the Grants Accounting Office for processing.

**Instructions for Student Payment Form**

Please enter student name, UR ID, and department where research will happen during the summer on the first line of the request form.

**Students Living On-Campus**

If the student is living on-campus, please select Yes; if not, please select No. This information is for verification purposes only.

**International Travel**

Please indicate if the student will travel outside the US to perform any work during the summer.

**Index/Acct/Amount/Grant Information**

Please enter each grant, cost share, and/or department index number to charge as well as the account code. You may find the appropriate grant or cost share index and account number on your monthly budget.
report. If you need assistance with selecting the appropriate index or account, please contact the Grants Accounting Office. You must also enter the amount to charge each grant, cost share, or department. Finally, please enter your grant title. The Grants Accounting Office will use this information to ensure the summer pay is accurately charged.

**Total Amount/Number of Weeks Worked/Hourly Rate/Estimated Hours/Start & End Date:**

Please enter the student’s total pay amount for the summer, the total number of weeks the student will be working, estimated hours per week, and the start & end date of employment. The hourly rate will calculate automatically if you complete the form electronically. Please note that if you have an international student on an F-1 or J-1 visa working on your grant over the summer, they must adhere to the 40 hours/week stipulation or they may jeopardize their visa status.

**BannerWeb Approvers:**

Please enter the name of the person who will be approving the hours worked. Please also enter a proxy in the event the approver is unable to approve the time. The approver and the proxy must have first-hand knowledge of the research. The Principal Investigator should be the approver and another faculty member, Post Doc, or Lab Manager can be the proxy. Department Admins cannot approve time. We are suggesting this approach so that all students working on the same grant will appear in BannerWeb under the PI, which will make the bi-weekly approval process easier. Proxies are able to access to the PI’s unique identifier in BannerWeb so they may also see all the students needing timecard approval in one place. Please contact the Grants Accounting Office if you have questions or special circumstances involving approval for your students so we can ensure proper set up in BannerWeb.

**Signature and Date:**

The PI must sign and date the form before forwarding it to the Grants Accounting Office. If the PI signs the form electronically, they must use their UR email account to send the form to the Grants Accounting Office Inbox. grants@richmond.edu

**Grants Accounting Office EPAF Transaction Number, Date, & Grants Accounting Signature**

The Grants Accounting Office will complete these fields.

If you have any problems or questions, please do not hesitate to contact the Grants Accounting Office for assistance.
